

ARJUN PV

Pvarjun527@gmail.com | +91 9946269473 | LinkedIn.com/in/arjun-pv1312 | GitHub.com/arjunpv1312 | Kerala, India

PROFESSIONAL PROFILE

BTech student in Artificial Intelligence and Data Science with practical experience in building web applications and AI systems. Ranked 57th nationally in Career Readiness Challenge 2026. Google Gemini Student Ambassador selected through competitive invite-only process. Participant in India AI Impact Buildathon 2026 with 40,000+ competitors nationwide. Holder of 20+ professional certifications in AI, cloud computing, and data science. Strong technical foundation with hands-on project experience in full-stack development, machine learning, and generative AI. Actively seeking internships in AI and data science roles.

TECHNICAL COMPETENCIES

- Programming Languages: Python (Advanced), HTML5 (Advanced), CSS3 (Advanced), C++ (Beginner)
- Artificial Intelligence: Machine Learning (Intermediate), Generative AI (Intermediate), Neural Networks, AI Tools and Workshops
- Data Science: Data Science (Intermediate), Data Analytics, Data Visualization, Statistical Analysis, Microsoft Data Analytics
- Web Development: Flask (Intermediate), Bootstrap, Responsive Design, Full-Stack Development, Single-Page Applications, Contact Forms with File Attachments
- Cloud Services: AWS Cloud (Intermediate), AWS Cloud Foundations, Cloud Architecture Basics
- Tools and Technologies: Google AI Studio, LLMs, Prompt Engineering, LangChain, RAG Pipelines, Git, GitHub, Jupyter Notebooks

PROFESSIONAL EXPERIENCE

- **Google Gemini Student Ambassador**
Communicate and Google | JCT College of Engineering and Technology | May 2026 to Present | Hybrid
 - Selected through competitive invite-only process for official Google Gemini Student Ambassador program
 - Representing Google Gemini AI tools and driving AI awareness on campus
 - Conducting workshops to educate student community about generative AI and Gemini technologies
 - Serving as liaison between Google and student developer community at JCT College

MAJOR ACHIEVEMENTS AND RECOGNITION

- Ranked 57th nationally in Career Readiness Challenge 2026 among thousands of participants - completed all phases of rigorous career aptitude assessment
- Participant in India AI Impact Buildathon 2026 - competed among 40,000+ participants nationwide in a premier AI innovation challenge organized by HCL GUVI
- Google Gemini Student Ambassador 2026 - selected through competitive invite-only process to represent Google Gemini on campus
- Active Participant in HCL GUVI AI Blogathon 2026 - contributed to technical AI-focused content creation

PROJECTS

- **Personal Portfolio Website - Flask Single-Page Application**
GitHub: github.com/arjunpv1312/portfolio | Live Demo: personal-portfolio--serenayt06.replit.app
 - Developed Flask single-page application showcasing AI and data science projects and professional experience
 - Implemented neural network hero animation and dark/light theme toggle functionality
 - Designed 11 content sections with animated counters, project carousel, and working contact form with file attachment capability
 - Achieved full mobile responsiveness and responsive design across all device sizes

- Built using Python Flask, Jinja2 templating, JavaScript, Bootstrap 5, HTML5, and CSS3
- **Student Management System - Full-Stack CRUD Web Application**
GitHub: github.com/arjunpv1312/student_management
 - Built complete CRUD web application for college administration and student record management
 - Implemented core features including add, edit, delete student records with search functionality
 - Designed clean and intuitive admin dashboard interface for managing student data and operations
 - Created SQLite database backend for reliable data storage and management
 - Technology stack: Python Flask, SQLite, HTML5, CSS3, Bootstrap framework
- **ShoPperZ - E-Commerce Frontend Application**
GitHub: github.com/arjunpv1312/ShoPperZ | Live Demo: arjunpv1312.github.io/ShoPperZ/
 - Developed e-commerce frontend application from scratch using zero external component frameworks
 - Implemented auto-sliding hero banner with smooth transitions and product grid layout
 - Created add-to-cart functionality with shopping cart interactions and checkout flow
 - Built responsive hamburger navigation menu for mobile devices with smooth animations
 - Built entirely using pure HTML5, CSS3, and JavaScript with no external frameworks
 - Deployed on GitHub Pages with continuous availability

EDUCATION

- **Bachelor of Technology in Artificial Intelligence and Data Science**
JCT College of Engineering and Technology | 2024 to 2028 | Currently in College
- **Plus Two - Science Stream**
Kerala State Board | 2022 to 2024
- **Secondary School Certificate (SSLC)**
Kerala State Board | 2021 to 2022

PROFESSIONAL CERTIFICATIONS AND CREDENTIALS (20+)

Featured Certifications:

- Google AI Studio App Deployment - Google for Education, GUVI, HCL
- AWS Cloud Foundations - Amazon Web Services
- Microsoft Data Analytics - Microsoft
- Generative AI Certificate - GenAI Technologies
- Intro to Generative AI and Agents - Generative AI Technologies
- Explore Machine Learning with Python - Infosys Springboard
- Python Coder Badge - Kaggle

Additional Certifications:

- Power BI Certification - Microsoft
- Claude Code: Coding Assistant - Anthropic
- Vibe Coding with Replit - Replit
- Vibe Coding in Windsurf - Windsurf IDE
- Yuva AI for All - NASSCOM FutureSkills Prime
- HCL GUVI AI Blogathon - HCL GUVI 2026
- Create Your Own AI Tools - SkillEcted Campus Program
- AI Workshop Completion - Artificial Intelligence Workshop
- Mindluster Certification - Mindluster Online Learning Platform
- Professional Career Development - Skillified Mentor
- IGEN GREENDAY 2024 - Institution of Green Engineers
- India AI Impact Buildathon - HCL GUVI 2026
- Career Readiness Challenge 2026 - upDt Education Technology

CORE AREAS OF EXPERTISE

- Artificial Intelligence: Building and experimenting with machine learning models and AI-powered tools
- Data Science: Turning raw data into clear insights using statistical analysis and data visualization
- Programming and Development: Writing code in Python, HTML/CSS, and C++ with hands-on project experience
- Web Development: Creating full-stack web applications using Flask and modern web technologies
- Cloud Computing: AWS Cloud services and cloud architecture fundamentals
- Problem Solving: Competing in national-level challenges and solving real-world problems methodically
- Research and Learning: Staying current with AI developments through courses, workshops, and hands-on practice

CURRENTLY LEARNING AND EXPLORING

- Deep Learning and Neural Networks - CNNs, RNNs, Transformers
- LangChain and RAG Pipelines - Building retrieval-augmented AI applications
- Large Language Models and Prompt Engineering - Working with Gemini, Claude, and GPT APIs
- Data Engineering - Pandas, NumPy, SQL pipelines, and ETL processes
- Model Fine-Tuning - Fine-tuning open-source language models on custom data
- Git and Open Source Workflow - Version control, pull requests, and collaborative development

TOOLS AND TECHNOLOGIES

- Programming IDEs: VS Code, Jupyter Notebook, Replit, Windsurf
- AI and ML Tools: Google AI Studio, Generative AI platforms, Neural Network tools
- Web Frameworks: Flask, Bootstrap, HTML5, CSS3, JavaScript
- Databases: SQLite
- Version Control: Git, GitHub
- Cloud Platforms: AWS
