AI / Machine Learning Engineer Intern

SUMMARY

Artificial Intelligence and Data Science undergraduate (Bachelor of Technology) building machine learning, NLP and Generative AI applications in Python with Flask, REST APIs, Celery/Redis and the Gemini API (LLM) on Google Cloud Run. Ranked #57 nationally - top 1% of 5,000+ - in the Career Readiness Challenge 2026 and won Most Deployable Project at Tech for Good 2026 over 23 teams.

EDUCATION

B.Tech, Artificial Intelligence & Data Science - JCT College of Engineering and Technology, Coimbatore
2024 - 2028 | CGPA: 8.01/10

HSE (Science) - Government Higher Secondary School, Kadambur, Kerala |**SSLC - Government Higher Secondary School, Kadambur, Kerala**
2022 - 2024 | 87.1% *2022 | 79%*

TECHNICAL SKILLS

- Languages: Python, TypeScript, JavaScript, SQL, HTML5/CSS3
- AI & ML: Scikit-learn, TF-IDF, NLTK, VADER, TextBlob, feature engineering, stratified k-fold cross-validation, ROC-AUC, model evaluation
- Generative AI: Gemini API, prompt engineering, few-shot prompting, LLM fallback design, retry and rate-limit handling, Google AI Studio
- Engineering & Cloud: Flask, FastAPI, Express, REST API design, React 19, Node.js, Celery, Redis, WebSocket's, PostgreSQL, Docker, Docker Compose, Google Cloud Run, Render, Git/GitHub

PROFESSIONAL EXPERIENCE

AI & Data Science Intern - Horizon TechX
Remote | May 27 - Jun 28, 2026

- Built Lumiq, a Flask + Scikit-learn platform automating EDA, sentiment classification and PDF/Excel reporting for uploaded CSV datasets; deployed to Render in a multi-stage Docker image with UptimeRobot health monitoring.
- Benchmarked four TF-IDF classifiers (Complement Naive Bayes, Logistic Regression, SGD, Linear SVM) under stratified 3-fold cross-validation, auto-exporting an accuracy / precision / recall / F1 comparison report; the best model reached 94.2% F1 and 0.964 ROC-AUC on an 80/20 stratified split and was served through a live /predict endpoint.
- Engineered an asynchronous Celery + Redis job pipeline on PostgreSQL 16 with Alembic migrations, replacing in-process threads and streaming live progress to the browser over Flask-SocketIO WebSocket's; added CSRF protection and per-endpoint rate limiting.

Web Development Intern - InAmigos Foundation
Remote | May 20 - Jun 3, 2026

- Built and deployed AI Interview Coach, a Gemini-powered mock-interview platform (React 19 / TypeScript + Express) on Google Cloud Run inside a two-week sprint, generating role-specific interviews with real-time scored feedback across 11 company question banks.
- Implemented a five-model Gemini fallback chain with API-key rotation on HTTP 429 responses, so interview sessions completed without failure when a model hit quota limits.

PROJECTS

Lumiq - AI Data Analysis & Sentiment Platform: GitHub
Flask - Scikit-learn - Celery - Redis - PostgreSQL - Docker

- Benchmarked four TF-IDF classifiers (Complement Naive Bayes, Logistic Regression, SGD, Linear SVM) under stratified 3-fold cross-validation; the best model reached 94.2% weighted F1 and 0.964 ROC-AUC on an 80/20 stratified holdout, served through a live /predict endpoint.

Ulavan Connect - WhatsApp AI Price Verification for Turmeric Farmers
Team of 3; my scope: Gemini pipeline, FastAPI backend, WhatsApp integration | Most Deployable Project, Tech for Good 2026 (23 teams)

- Built the Gemini prompt-chaining pipeline extracting turmeric variety and trader-offered price from Tamil voice or text queries and classifying each offer as Fair Price, Negotiate or Too Low against live AGMARKNET / data.gov.in market prices, with a 30-day backup price file as fallback when live data was unavailable.
- Developed the FastAPI /verify-price backend with request validation and rate limiting, and wired it to the WhatsApp webhook with message queuing; deployed to Google Cloud Run.

AI Resume Analyzer Pro - ATS Resume Analysis Platform: GitHub
React 19 - TypeScript - Express - Tesseract OCR

- Engineered a full-stack platform with 14 REST endpoints parsing PDF, DOCX and XLSX uploads, including an OCR fallback for scanned resumes.
- Authored a deterministic ATS engine scoring rule compliance, formatting, JD keyword coverage and bullet-point quality, with penalties for scanned PDFs and generic filenames.
